Proposal format: One-pager or Full proposal (MPS calculator)

Kam, 2026-10-12: *"on the Quick quote tool, when someone generates a quote, they should have a choice to build a 1 pager or full proposal as per the template built based on the sample already provided" · "MPS calculator, one-pager option on the same template"*

Productivity | Security | Convenience

48-month support | STANDARD PRICING

11	$77,800.00	48 months
proposed devices	upfront package · ex GST	service / licence coverage

Proposal ref Q-SAMPLE-2001 • Issued 10 October 2026 • Standard-price validity: 45 days • Prepared by Datasec Solutions / HP Solutions Centre | Standard-pricing edition | Indicative, non-binding

A sample logistics company needs one print service for its depot offices and for wall signage. This demo proposal shows a purchase package of office and large-format devices with four years of support.

- Reliable print, copy and scan in every depot office.
- Safety signage and floor maps printed on site when needed.
- Usage charges the operations manager can follow month by month.

Commercial snapshot

Package	Fleet detail	Qty	Line total, ex GST
Sample A3 colour MFP package	7 × Sample A3 colour MFP, 45 ppm; 7 × Sample paper tray and stand; 7 × Sample third-party card reader; +5 more	7	$57,940.00
Sample large-format MFP package	4 × Sample 24-inch large-format MFP; 4 × Sample 48-month large-format support; 4 × Sample large-format installation and training	4	$19,860.00
TOTAL 48-MONTH FLEET PACKAGE		**11**	**$77,800.00**

Total is the sum of customer-facing package totals rounded to cents, not a monthly rental fee.

Optional items are listed in the full proposal.

Device-class usage rates

Usage component	Device class	Customer rate, ex GST	Billing basis
Monochrome office prints	Office MFP	$0.0061	per page
Colour office prints	Office MFP	$0.0580	per page
Wide-format ink	Large format	$1.10	per ml
Media / paper	Large format	Not included	Customer supply or separately quoted

Commercial Summary and Next Steps

01 Sample Customer A confirms its fleet allocation, site locations, volumes and output requirements.

02 Datasec confirms standard price validity, usage billing method, hardware support entitlement and included options.

03 Both parties approve technical design, Microsoft tenant dependencies, consumables and deployment/UAT plan.

48-month device support with coordinated consumables, service administration and fleet governance.

2 items to confirm before contract

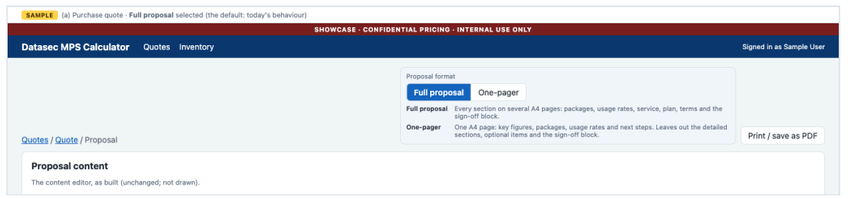

Proposal basis: *Prepared from quote Q-SAMPLE-2001, version 1, in the Datasec MPS calculator.*

SAMPLE **One-pager**, the same data on the same template: logo, palette, Arial sizes, running header and footer. One A4 page, printed.

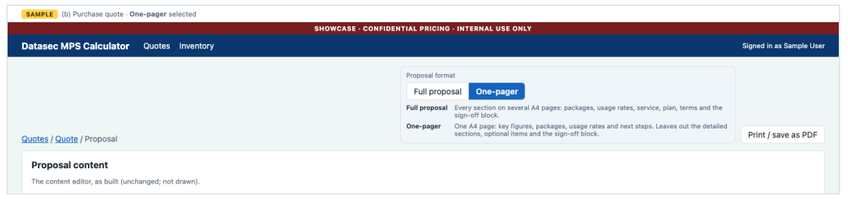

The choice, on the Proposal page (D-1, D-2)

A switch above the document, beside the existing **Print / save as PDF**. **Full proposal** is selected every time the page opens (today's behaviour). The Proposal link on the quote screen stays one link.

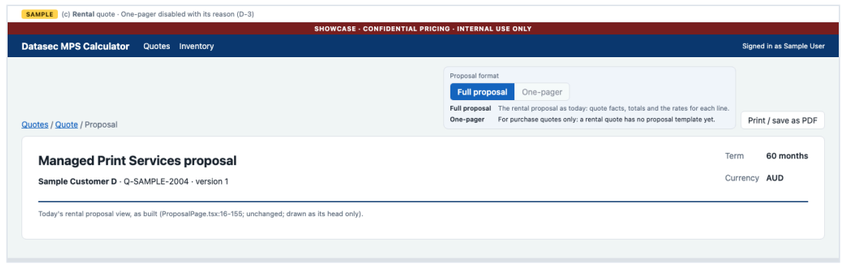

SAMPLE (a) purchase quote, Full proposal selected

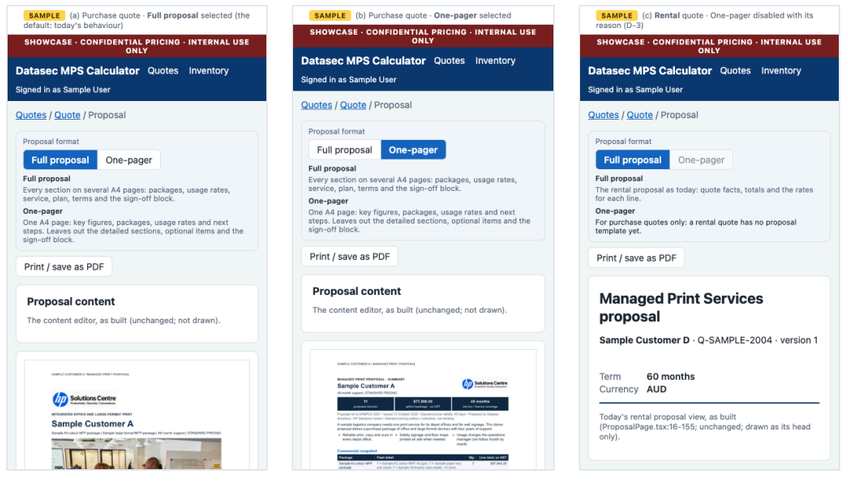

SAMPLE (b) purchase quote, One-pager selected

SAMPLE (c) rental quote: One-pager disabled, with its reason (D-3)

SAMPLE At 390 px (phone): (a), (b), (c), no sideways scroll

SAMPLE DATA · MOCKUP ONLY, NOTHING BUILT · B50

Approve with all the defaults, or change any numbered decision

What the one-pager keeps, condenses and drops (full proposal → one page)

Full proposal part	One-pager	Reason
Running header, footer, page number	**KEEP**	Same template; the footer carries the classification (Kam's card, C-13)
Logo	**KEEP, smaller**	44 mm beside the title (cover: 62 mm above it): height
Kicker	**CHANGE**	`MANAGED PRINT PROPOSAL · SUMMARY` (D-8)
Title, sub-line	**KEEP · CONDENSE**	Title 16 pt. Sub-line = term + edition only: the cover's lists every package (5 lines at 9 packages, measured); the table names them
Hero image	**DROP**	About a third of the page (D-4)
KPI tiles: devices, upfront package, term	**KEEP**	The three numbers a reader wants first
Ref · issued · validity · prepared-by	**KEEP, one paragraph**	Validity is the commercial condition; "Indicative, non-binding" stays. Measured 2 lines, not 1
1 Executive summary	**CONDENSE**	First paragraph, cut at a sentence end ≤ 600 characters, then "…" (D-6). Shown as the lead paragraph without its heading (7 mm, measured)
1 Client context	**DROP**	Narrative; stays in the full proposal
1 Intended outcomes	**CONDENSE**	First 3, one bullet each, in 3 columns. Bullet = the card title for "Title: point; point" lines, else the line ("Outcome n" says nothing)
1 Commercial snapshot + 5 Fleet schedule	**KEEP, one table**	The price. §5's heads (Package · Fleet detail · Qty · Line total, ex GST) and total row; fit rule applies
1 Pricing interpretation callout	**CONDENSE**	One line: the template's own "Total is the sum of … not a monthly rental fee." (its first sentence names every package and grows)
2 Scope · 3 Office · 4 Large format	**DROP**	Narrative and capability text
5 Detail column	**CONDENSE**	Up to 3 detail lines per package, then "+n more" (as the built cap, `ProposalDocument.tsx:295`)
5 Optional items	**DROP + 1 line**	"Optional items are listed in the full proposal." when any exist (D-7)
5 Package includes, supply model, reconciliation	**DROP**	Detail; the total row reconciles on the page
6 Usage rates table	**KEEP**	Up to 6 rates, plus the Media / paper row the full table adds for large format
6 Rate method, software (bundle + credit), boundaries	**DROP**	Detail
7 Service · 8 Implementation · 9 Governance	**DROP + 1 line**	§7's own strap: "{term}-month device support with coordinated consumables, service administration and fleet governance." (existing words)
10 Confirmation register	**CONDENSE**	"n items to confirm before contract" when n > 0: it is not final
10 Exclusions, document status	**DROP**	Full proposal; "Indicative, non-binding" is on the page
11 Commercial summary rows	**DROP**	Term is in a tile and validity in the ref line: both already on the page
11 Next steps	**CONDENSE**	First 3
11 Acknowledgement / signature	**DROP**	A one-pager is indicative; signing uses the full proposal (D-5)
11 Proposal basis	**KEEP, 1 line**	Names the quote and version
DRAFT watermark, draft banner, internal footer	**KEEP**	Exactly as the full proposal: today's rule, no new one

Customer-safe figures (D-9)

- Built on the server through **one allow-list** (`Proposal.cs:16–25`; `Dtos.cs:391–394`): no cost, markup, margin, rebate or profit field (`model.ts:4`); the same body for every role (`docs/API.md:118–120`).
- **Ex GST only** (`settings.ts:18–19`): the inc-GST total exists and is not shown. The guard test's banned words (`ProposalDocument.test.tsx:132`) appear 0 times on all four renders.
- The one-pager reads **only** fields of the same `GET /proposal` response that the full proposal already shows, and **adds no field**.

The fit rule (D-6): one A4 page, never two

- Package rows: up to **6**; with more, the top **5 by package total** plus "and n more packages" with their combined total, so the TOTAL row still equals the purchase total.
- Detail lines: up to **3** per package, then "+n more". Usage rates: up to **6**, then "and n more rates (see full proposal)".
- Outcomes **3**, next steps **3**, summary ≤ **600** characters. Nothing below the template's 8.5 pt table size.

SAMPLE Overflow: 9 packages × 7 lines, 6 rates, 1,400-character summary, 8 steps → 1 page.

Printed (headless Chrome, A4, 25.4 mm)	Pages	Room left
typical	1	57 mm
draft	1	52 mm
small	1	89 mm
overflow	1	**8 mm**
overflow as a draft (banner adds a line)	1	**3 mm**
control: overflow, caps off	**2**	none

The caps limit *how many* rows, not *how long* a text is. Very long package names, detail lines, next steps or a custom sub-line can still fill the last 3–8 mm: the build needs a print test on this overflow data and a rule for long text.

FR lines, for Kam to overrule

- **FR-EXP-010** says an unapproved quote disables customer export. Today a draft proposal shows with a DRAFT watermark and an internal footer (FR-EXP-011). The one-pager follows today's full-proposal behaviour exactly and adds no new rule.
- **FR-EXP-005**: the one line under each option says what it includes and leaves out.
- **Spec §16 Template Library / Designer** (FR-TPL-001…012) is not built. The one-pager is a second fixed layout of the built template, not a template-library entry.
- **FR-TPL-008**: A4 portrait, met.

New words: 15

7 on the choice (Proposal format · Full proposal · One-pager · the three one-line descriptions · the rental reason). 8 on the one-pager (the kicker · "and n more packages" · "+n more" · "and n more rates (see full proposal)" · the optional-items line · "n items / 1 item to confirm before contract" · the "…" cut mark). Everything else is existing template wording. List: `NEW_WORDS.md`.

Decisions for Kam (defaults in bold)

1. **D-1 Where the choice sits: a switch on the Proposal page** · or two buttons on the quote screen.
2. **D-2 Default choice: Full proposal, every time** · or remember the user's last choice.
3. **D-3 Rental quotes: One-pager for purchase quotes only for now, disabled with a reason on rental** (the template exists only for purchase) · or a rental one-pager on the template too (a bigger job).
4. **D-4 Hero image: dropped** · or a short band.
5. **D-5 Signature block: dropped** · or kept.
6. **D-6 Fit rule: as in the box on the left** · or a summary by device class instead of package rows.
7. **D-7 Optional items: one line pointing to the full proposal** · or listed.
8. **D-8 Wording: switch label "One-pager" (your word) and kicker MANAGED PRINT PROPOSAL · SUMMARY** · or your wording.
9. **D-9 Figures: only what the full proposal already shows, ex GST** (for the record; no choice proposed).
10. **D-10 Record which format was generated** on the proposal-generated event (FR-EXP-008): **yes**. `needs: a format on the proposal-generated event` (a build item).

Build notes (not decisions)

- `needs: the combined total of the remaining packages from the server`: the "and n more packages" amount is a sum. The document's own rule is that the browser never totals anything (`format.ts:1–2`; spec §1.2).
- The build sits on top of B46 (`b46/home-dashboard` changes `Lifecycle.tsx` and `router.ts`); the quote screen is drawn as on `main`.
- The cover on page 1 is a static replica of the built cover (`ProposalDocument.tsx:229–266`), not the running app.
