

HPSM-POC: what HP will see on Tuesday

Reading copy for Kam, before HP's review on Tue 13 Oct 2026. Drafted 11 Oct 2026 for Friday.
Datasec / HPSM-POC only.

All data shown is synthetic. Every customer, figure and screenshot in this pack is made-up sample data from the demo seed or test fixtures. No HP data and no real customer data.

What changed for Tuesday

- **Industry on customers.** A customer can now carry an industry, picked from a list (for example "Healthcare (HIPAA)"). Display only: it changes no score. Beside it on Home, a greyed-out "Your tools (coming later)" placeholder that does nothing yet.
- **Device identifiers dropped at import.** When a device file is imported, serial number, IP address, MAC address, host name and location are no longer kept. Firmware, model and the counts are kept.
- **"Preview: next phase" attribution page.** A new, clearly labelled page showing how activity could be attributed in the next phase. It runs on synthetic sample data, marked SAMPLE. Customers appear only as ORG-nnnnn aliases; staff and printer numbers only as ranges.
- **Aliases on the Automation metrics dashboard.** The Customer column now shows ORG-nnnnn instead of the customer's name, and the linked per-customer metrics page shows the alias to Demo callers.

Testing

All three pieces of work were independently tested by a separate QA seat:

- industry field: gate **B201**, GO WITH NOTES;
- device identifiers: gate **B205**, GO WITH NOTES;
- preview page and aliases: gate **B204**, round 1 GO WITH NOTES, round 2 GO WITH NOTES.

Nothing is on the hosted site yet. Everything here was built and tested on the laptop. Whether to deploy before Tuesday is question (i) at the end.

Inside: screenshots (pages 2 to 8), the new words for you to approve, then three questions. Friday will make the recommendations separately.

ALL SCORED RUNS

Automation metrics

Proposed definitions

What the POC measures on each run: consultant effort, findings and changes, against today's manual delivery.

Include trial runs

None of the 2 runs has measured timings

Their steps were recorded at one instant, as the sample data is, so their time cannot be measured. They show as "Not measured" and are left out of the medians. Their findings and changes still count.

Runs counted

2

Scored customer assessments you can see.

Median elapsed time

Not measured

First recorded step to first report (or to submit). No run has measured timings yet.

Median consultant active time

Not measured

Time the assessment screens were in use. No run has measured timings yet.

Median report generation

Not measured

From request to PDF. No run has measured timings yet.

Findings raised

13

By the rules, from the answers, across every run.

Changed by a person

0 (0% of findings)

Findings amended, suppressed or risk-accepted, and narratives edited or rejected; each with an audit note.

Narrative drafts

1 (0 failed)

All narrative drafts attempted, and how many failed and fell back.

Manual baseline

Not supplied

Consultant hours for today's manual delivery.

Consultant effort saved

Not supplied

Needs the manual baseline; never estimated.

Feedback

Each run (2)

Oldest first. Each run against the manual baseline, once it is supplied.

Customer	Submitted	Elapsed	Consultant active	Report	Findings	Changed by a person	Narrative drafts	Manual baseline
ORG-00004	11 Oct 2026	Not measured	Not measured	Not measured	6	0	0 (0 failed)	Not supplied
ORG-00005	11 Oct 2026	Not measured	Not measured	Not measured	7	0	1 (0 failed)	Not supplied

Manual baseline not supplied yet

The comparison with today's manual delivery needs Datasec's baseline hours. Until then this page shows the tool's own measures only. Nothing here is a claimed saving.

Prototype - sample data only

Automation metrics dashboard as Demo, desktop. In "Each run (2)" the Customer column now reads ORG-00004 and ORG-00005, where it used to show the sample customers' names.

5. Automation metrics, after, 390 (phone)

Sample data: location and Active/Report status are sample values for the items; devices and sites are sample values across the customer's profile records then. Names, stages, scores and activity are invented.

Name	Industry	Devices	Sites	Status	Stage	Last activity	Actions
B201 Bankia Finance (sample)	Financial services (PCI DSS)	—	—	—	New lead	11 Oct 2026	...
B201 Galah Retail (sample)	Retail	—	—	—	New lead	11 Oct 2026	...
B201 Kookaburra hotel (sample)	Local government	—	—	—	New lead	1 Oct 2026	...
B201 Mo Industry (sample)	Not recorded	—	—	—	New lead	11 Oct 2026	...
B201 Quokka hotel (sample)	Logistics	—	—	—	New lead	1 Oct 2026	...
B201 Wallaby health (sample)	Healthcare (HIPAA)	—	—	—	New lead	11 Oct 2026	...
B201 Wharfedale Long Name Healthcare Group (sample)	Healthcare (HIPAA)	—	—	—	New lead	11 Oct 2026	...
B201 Wharfedale Long Name Healthcare Group (sample)	Healthcare (HIPAA)	—	—	—	New lead	11 Oct 2026	...
Overbridge Logistics (sample)	Logistics & warehousing	310	9	Active	Assessment in progress	24 Sept 2026	...
Sample customer B (sample)	Healthcare (HIPAA)	65	9	Active	Assessment in progress	24 Sept 2026	...
Sample customer C (sample)	Education	40	2	Pending	New lead	24 Sept 2026	...

Showing 1-10 of 10 customers

Prototype - sample data only

Customers list, from the B201 test run. The Industry column shows the listed labels, for example "Financial services (PCI DSS)" and "Healthcare (HIPAA)". Test customers are prefixed B201.

The "Your tools (coming later)" placeholder is not pictured in this pack; the builder's evidence holds a shot of it.

New words for you to approve

Copied verbatim. "Where" says where it shows on screen. Key: **NEW / CHANGED** new or changed in the latest round, listed first; **NEW IN PREVIEW, UNCHANGED** written for the preview page (B202) and not changed since; **EXISTING** wording that already existed.

A. Industry field and placeholder (B200). All new.

Only file paths were removed: one in row 4 (after "HIPAA") and the bracketed file name in row 6. Nothing else changed.

#	String	Where	
1	Button label "Your tools (coming later)" (no tooltip).	Home, the greyed-out placeholder	NEW
2	Hint under the industry select: "In brackets: the regulation that industry usually brings, as a prompt for prioritising. It is not a finding or a compliance claim."	Add / edit customer form	NEW
3	Option format "Healthcare (HIPAA)", "Financial services (PCI DSS)" . Kam wrote "Finance". I mapped it onto the existing label "Financial services" (B09-C, and C-34 §F's words).	Industry select and Industry column	NEW
4	For Kam to check, not built: – HIPAA is a US law. For an Australian healthcare customer, the local equivalent may be what Kam means: the Privacy Act 1988 / My Health Records Act. – PCI DSS applies to anyone who takes card payments, Retail included. Should Retail name it too? – The other eight labels carry no framework, because the project's content has no source line for them. The Composer bundle lists five framework profiles (ISO 27001, Essential Eight, NIST CSF, SOC 2, HIPAA), but none is mapped to an industry. Candidates such as Government → Essential Eight / PSPF are suggestions only.	Not on screen: checks on row 3	TO CHECK
5	API error text: "industry is one of the listed industries (contract Industry), or left out."	API answer when an unlisted industry is sent	NEW
6	Contract 0.15.0 changelog paragraph	API contract changelog	NEW

B. Preview page and aliases (B207), new and changed first

#	String	Where	Status
39	NEW notKeyed body (PROPOSED): [It has / They have] no assessments yet. [Its / Their] N assessment(s) count(s) in the totals and the months, but under no partner or engagement. – then: [It was / They were] made before customers carried an engagement and partner.	Preview page, blue note body (true for 0, 1 and N)	NEW in B207, PROPOSED
38	OLD notKeyed body: {N} of their assessments count in the totals and the months, but under no partner or engagement: they were made before customers carried an engagement and partner.	Preview page, blue note body (the wording in the screenshots; false for 0)	REPLACED by B207
52	ORG-nnnnn in the Automation metrics "Customer" column (was the customer's name)	Automation metrics, Customer column	NEW in B207 A1
53	No alias (made before the keys)	Automation metrics and the linked customer page, for a customer with no stored alias	NEW in B207 A1, PROPOSED
54	Alias not available yet (no scored run)	Linked customer page, Demo caller, customer with no run	NEW in B207 A1, PROPOSED
55	ORG-nnnnn as the per-customer metrics page's customer line (was "name · industry")	Linked customer page, line above the heading, Demo callers only	NEW in B207 A1
37	N customer(s) made before the keys	Preview page, blue note title	B202 words, moved
1	Attribution (Preview)	Menu entry	B202, unchanged
2	Preview: next phase – Attribution · Security Services Playbook (POC)	Browser tab title	B202, unchanged
3	Attribution	Page heading	B202, unchanged

4	Preview: next phase (the eyebrow renders it in capitals by CSS: PREVIEW: NEXT PHASE)	Line above the heading, and the tag under it	B202, unchanged
5	How Playbook activity could be attributed in the next phase: assessments created, and revenue influenced by category, per engagement and partner.	Page intro	B202, unchanged
6	SAMPLE: synthetic figures, not HP data	Yellow alert title	B202, unchanged
7	Every revenue figure on this page is made-up sample data and is marked SAMPLE. There is no revenue data or HP data feed in this build; real attribution is next-phase work. Assessments created are counted from this site's own records. Customers are shown only as an alias (ORG-nnnnn), and staff and printer numbers only as ranges.	Yellow alert body	B202, unchanged
8	SAMPLE (title: Synthetic figure, not HP data)	Mark beside every revenue figure	B202, unchanged
9	Security Assessments Created	Tile and column	B202, unchanged
10	Hardware / Supplies / Solutions/Software / Services Revenue Influenced	Tiles	B202, unchanged
11	From this site's own records: every assessment of the customers you can see. N engagement(s), N partner(s).	Assessments tile hint	B202, unchanged
12	Synthetic figure, not HP data: seeded figures that show the layout.	Revenue tile hint	B202, unchanged
13	\$N (whole US dollars)	Money format	B202, unchanged
14	N (a count)	Counts in tiles and cells	B202, unchanged
15	By month / By partner / By engagement	Section titles	B202, unchanged
16	Calendar months (UTC), oldest first. Assessments from this site's records; revenue is sample data.	By month intro	B202, unchanged
17	Partner organisations by this site's own opaque id (not an HP partner id).	By partner intro	B202, unchanged

18	One engagement per customer. Customers appear only as an alias; staff and printers only as ranges.	By engagement intro	B202, unchanged
19	Assessments created and sample revenue influenced, by month	Table caption (screen reader)	B202, unchanged
20	Engagements, assessments created and sample revenue influenced, by partner	Table caption (screen reader)	B202, unchanged
21	Each engagement: customer alias, size ranges, assessments created and sample revenue influenced	Table caption (screen reader)	B202, unchanged
22	<section title>, table	Scroll area's name (screen reader only)	B202, unchanged
23	Month	Column header	B202, unchanged
24	Partner · Engagements	Column headers (By partner)	B202, unchanged
25	Customer · Engagement · Partner · Industry · Staff · Printers · First assessment	Column headers (By engagement)	B202, unchanged
26	Hardware · Supplies · Solutions/Software · Services	Category column headers	B202, unchanged
27	revenue influenced (sample)	Screen-reader ending of each category header	B202, unchanged
28	Month label, e.g. October 2026 (UTC month)	By month row headers	B202, unchanged
29	Shortened ids PTR-...xxxxxx / ENG-...xxxxxx (full id in the title)	Partner and engagement cells	B202, unchanged
30	ORG-nnnnn	Customer alias	B202, unchanged
32	Not recorded	No industry / staff / printers	B202, unchanged
33	None yet	No first assessment	B202, unchanged
35	Staff ranges 1–49 · 50–249 · 250–999 · 1,000–4,999 · 5,000 or more	Staff column (PROPOSED edges)	B202, unchanged
36	Printer ranges 0–24 · 25–99 · 100–499 · 500–1,999 · 2,000 or more	Printers column (PROPOSED edges)	B202, unchanged

40	Loading the preview...	Loading state	B202, unchanged
42	The preview could not be loaded	Error title	B202, unchanged
45	The service shows this preview to Admin, Consultant and Demo accounts.	Line shown when the service refuses the role	B202, unchanged
46	Not available to your role	Role screen title (Partner)	B202, unchanged
47	This preview is for Consultant, Admin and Demo users.	Role screen body (Partner)	B202, unchanged
48	Nothing to attribute yet	Empty state title	B202, unchanged
49	An engagement appears here once a customer is added.	Empty state body	B202, unchanged
31	Industry values (as recorded)	By engagement, Industry column (B200's labels)	B200, not new here
34	First-assessment day, e.g. 24 Sept 2026 (en-AU: Sept has four letters)	First assessment column	existing
41	Loading...	Before the session is read (shared wording)	existing
43	Try again	Error action (shared wording)	existing
44	describeFailure(...) sentences, e.g. Your role does not allow this.	Shared error wording	existing
50	Offline demo	Offline-demo tag in the header	existing
51	Automation metrics screen (item 5, N-3)	No string added in round 1	none

Two role lines with different orders, both kept as they are (Kam rules words):
 #45, the 403 line, says "Admin, Consultant and Demo accounts". #47, the role screen, says "Consultant, Admin and Demo users", the same order as the Automation metrics role screen.

After the alias change, no other caption, header or hint on the Automation metrics screen changed; the column header still reads "Customer".

Three questions

Reading copy; the cards on your board carry the same three. No recommendation here: Friday will make those.

(i) Deploy main to the hosted site before Tuesday?

None of this work is on the hosted site. Per the latest records, industry and the import change are on main; the preview page and the aliases passed their gate (B204 round 2), with merging still to do. Should main, with all of it, go to the hosted site before HP's review?

(ii) The customer page frame still shows the name to Demo

On the per-customer metrics page, the alias replaces the name above the heading, but the frame around every customer page (the breadcrumb and the journey rail) still shows the sample customer's name to Demo callers. The customer API also answers a Demo caller with the name. Leave as is, alias the frame too, or keep HP to the dashboard? (B207 A1-F1; B204 round 2, R2-N1.)

(iii) Customers made before the keys

Customers created before aliases (the "keys") existed have no alias, so they show "No alias (made before the keys)" until the demo data is reset. Is that acceptable for Tuesday, or should the demo data be reset first?
